

SECTION 3
GRAIN CLEANING EQUIPMENT
ROTARY GRANULATORS

KIPP KELLY
ESTABLISHED 1913

Operating Process

The Kipp Kelly Rotary Granulator is capable of producing an evenly cut product with a minimum of fines at a high capacity and close sizing of granulated product.

Typical use of the Kipp-Kelly Granulator is for the production of "Steel Cut" oats, which is then rolled into uniform flakes and a consistent cooking time.

Features

The Kipp Kelly Rotary Granulator is available in two, four and six drum sizes. Each can be customized to accommodate wide variations in processing specifications.
