

SECTION 3  
GRAIN CLEANING EQUIPMENT  
**ROTARY GRANULATORS**

---

**KIPP KELLY ROTARY  
GRANULATOR**

**Operating Process**

The Kipp Kelly Rotary Granulator is capable of producing an evenly cut product with a minimum of fines at a high capacity and close sizing of granulated product.

**Features**

The Kipp Kelly Rotary Granulator is available in two, four and six drum sizes. Each can be customized to accommodate wide variations in processing specifications.

**Capacity Chart for the Rotary Granulator\*\***

Product	Groat	Hard Wheat	Soft Wheat	Rye
4 Unit	2800	1200	4000	1600

*\*\*Capacities shown are in pounds per hour and represent a typical cut on our Number 10 Knife setting. It will cut each kernel into approximately 3 pieces. Capacities are reduced proportionally when finer cuts are desired. Capacities will vary depending upon the characteristics of the grain being processed.*

**Kipp-Kelly is the Original Patent Holder and  
Manufacturer of the Rotary Granulator**
